

FOR IMMEDIATE RELEASE

Building Envelope Associates represents Wooster Products, manufacturer and innovator of anti-slip safety stairs and walkways.

Building Envelope Associates announces an independent sales representative agreement with Wooster Products, manufacturer and innovator of anti-slip safety stairs and walkways. Sales management represented the product line as part of a prior Northeast agency and is pleased to align again with Wooster Products to conduct sales in Southeast Florida. The group is excited to introduce the advantages of the top-grade, anti-slip, safety products for code compliance to customers.

“Wooster Products provides the highest quality, anti-slip stairs, treads and walkway products, including luminescent options that meet or exceed OSHA, ASTM and ADA requirements,” said John Massengill, Building Envelope Associates President. “We work with manufacturers that bring value to our customers and Wooster Products has a long history of providing the most reliable safety stair solutions in the industry.”

Wooster Products manufactures durable anti-slip safety stair and walkway systems that mitigate injuries from slippery or damaged stair conditions by providing pedestrians and building occupants anti-slip protection. Since 1921, the company has innovated and enhanced original safety products. For over 100 years, Wooster anti-slip safety systems have been time-tested delivering long-term solutions to anti-slip requirements. The company is dedicated to the core value of making every step a safe one.

The latest innovations in anti-slip stair treads and walkway products have been developed to satisfy new building codes and various applications. The line includes cast iron, cast aluminum, extruded aluminum and photoluminescent (glow-in-the-dark) nosings and treads. Also, pressure-sensitive adhesive tapes and coatings. Wooster safety products are compatible for new or renovation projects, with options designed for installation over existing stairs. Treads are custom cut, pre-drilled and ready for installation. Luminescent treads, powered by natural and artificial light, outline stair egress in low light conditions to comply with IBC, IFC and NYC codes.

About Building Envelope Associates: Building Envelope Associates assists the building owner, architect, consultant, contractor and distributor to select the best solutions to protect the exterior building envelope. The leading manufacturers represented are committed to sustainability. Building Envelope Associates offers the latest product advancements in roofing, waterproofing and building products, including premium-quality roofing membranes, coatings, insulations and accessories. These products meet and exceed industry standards, are engineered to perform longer, increase efficiency, extend life cycle, reduce waste and minimize environmental impact.
