Note: In situations where prolonged excessive membrane surface temperatures may be experienced, such as dark-colored membranes in Southern climates, roof surfaces that experience reflected sunlight or photovoltaic installations, DEXcell® Cement Roof Board is the preferred DEXcell® product.

Fire barrier meets FM Class 1 and UL Class A Fire ratings for roofing systems up to unlimited slope per UL 790.

DEXcell®

Glass Mat Roof Board

DEXcell® Glass Mat Roof Board is recommended for mechanically attached single-ply membranes, metal and fire/thermal barrier applications. It's manufactured with coated fiberglass facers and an enhanced moisture-resistant gypsum core. And it's coated on the front, back and sides for easy handling.

KEY FEATURES

- High-density coverboard/thermal barrier.
- Scores and snaps easily.
- Manufactured to meet ASTM C1177.
- Available in 1/4", 1/2" and 5/8" thicknesses, and 4'x8' size.
- Use as a part of a Class A, B or C roof covering. Tested in accordance with UL 1256, ULC CAN-S126 or FM 4450.

DEXcell

FA Glass Mat Roof Board

DEXcell FA™ Glass Mat Roof Board is recommended for fully adhered single-ply membranes, modified bitumen (cold applied), fluid applied, metal, and spray foam. It's also used on the roof side of parapet walls.

KEY FEATURES

- High-density coverboard/thermal barrier.
- Heavy-duty coated fiberglass facers for improved handling, strength and adhesion.
- Scores and snaps easily.
- Manufactured to meet ASTM C1177.
- Available in 1/4", 1/2" and 5/8" thicknesses, and 4'x4' and 4'x8' sizes.

DEXcell®

Cement Roof Board

Whenever a building will be exposed to moisture or high humidity, DEXcell® Cement Roof Board is the smart choice. It is manufactured of Portland cement, lightweight aggregate and glass mesh that provides an exceptionally hard, durable surface.

KEY FEATURES

- Suitable for all roof systems, including, but not limited to, fully adhered single-ply membrane, mechanically attached roof systems, modified bitumen, built-up roof systems, fluid applied, metal, and spray foam. It's also used on the roof side of parapet walls.
- Excellent bond/pull-through uplift values.
- Ideal for hot-mopped and torched applications.
- Superior moisture resistance.
- Impact resistant, extremely durable and dimensionally stable.
- Available in 7/16" thickness, and 4'x4' and 4'x8' sizes.

DEXcell

FA VSH Glass Mat Roof Board

DEXcell FA VSH™ Glass Mat Roof Board is an excellent choice for applications requiring maximum hail and puncture resistance. Enhanced wind uplift, fire and moisture resistance and dimensional stability help to protect the assembly and the building owner's investment.

KEY FEATURES

- Achieves FM VSH approval for single ply membrane assemblies.
- For mechanically attached and adhered assemblies.
- Easier to handle and install.
- Available in 5/8" 4x4 and 4x8 sizes.
- Manufactured to meet ASTM C1177.
