

Be Prepared for Storm Season!

With Roofing and Waterproofing Products that deliver quick repair solutions.

Storms occur with little warning and can be devastating from heavy winds and rains. Quick response is essential to repair damage. You will need products you can trust with proven performance. Choose repair and restoration products that allow for immediate action to repair storm damage.

Wet or Dry Application For Repairs!

POLYGLASS® POLYFLASH™ 1C

Superior Waterproof Seal, Quick Application.

PolyFlash™ 1C is a one-component liquid, moisture-cure, white reflective, flashing compound designed for sealing various types of roof membrane systems, other roof systems and waterproofing details such as walls, curbs, vents, roof drains, pitch pans and unusually shaped penetrations

Product Benefits:

- Seamless, monolithic application ensures a watertight seal
- Wet or dry application. Adheres well to most surfaces
- High tensile strength
- UV resistant
- Crack bridging capabilities
- Withstands extreme temperature conditions
- Easy application

POLYGLASS® POLYPLUS 50

Wet or Dry Seal, Even Under Water for Emergency Repairs.

PolyPlus 50 is a superior quality formulation for use in a wide variety of roofing applications such as SBS roofing system, various other membrane systems and wet, damp, or underwater conditions. PolyPlus 50 can be used for emergency repair, on shingles, BUR (Built Up Roofing), concrete, and general damp proofing.

Product Benefits:

- Excellent bonding strength and adhesion
- Versatile - for a variety of emergency repairs, even in standing water
- Adheres to any roof system
- High flexibility - for extreme temperature expansion and contraction
- Exceptional weathering properties
- Quick Application
